For Football Clubs, Children's Mini-soccer, Rugby Clubs, Golf Tournaments, Local Authority Events & Schools.

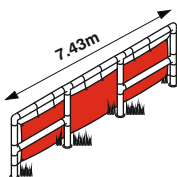

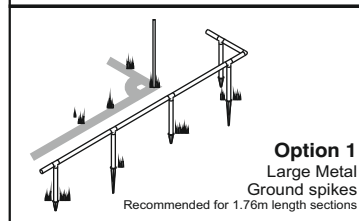

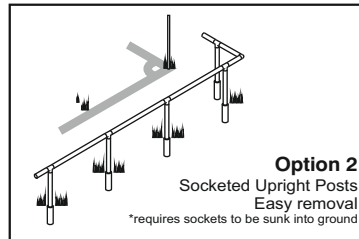

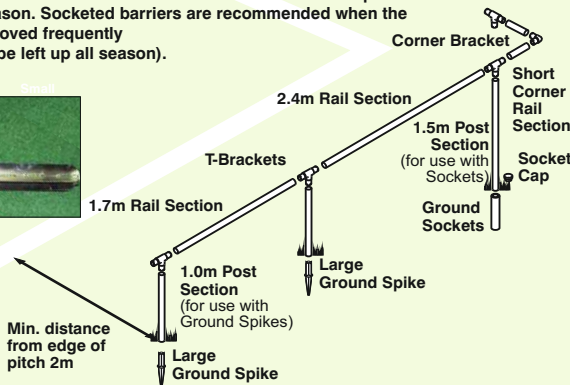

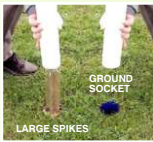

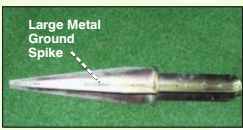

The Itsa Goal Spectator Barrier system is manufactured in either 1.7 or 2.4 metre uPVC 68mm post and rail sections connected by a strengthened polypropylene push and lock 'T' bracket. Supported by either sunken ground sockets or special steel ground spikes that require no digging. The quickest and easiest moveable ground spectator barrier system available. Safer than permanent steel barriers as they absorb impact when players collide into them. They can be removed quickly at the close of the season to speed grass cutting and pitch maintenance. The Ideal solution for partitioning cricket grounds from football and rugby pitches. Openings and gates can be created to allow easy access to the playing surface. For areas where people congregate the uPVC rail can be strengthened with aluminium inside the upvc tube or externally in place of the uPVC. Lightweight advertising banners in various colours are easily attached between the posts. Alternately solid boards can be fixed below the top rail.

2.4m Rail with 1.5m socketed Post (0.5m underground) Thorne Colliery FC - Doncaster

Post support options

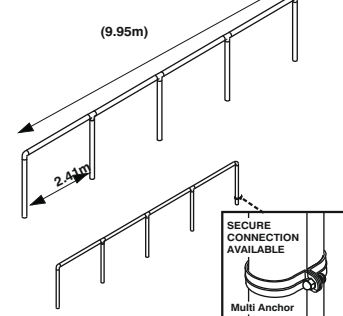

Ground spiked spectator barriers for surround that is to be left in position through playing season. Socketed barriers are recommended when the system is to be removed frequently (Both systems can be left up all season).
